

Migration of SIEM from MS Sentinel to SAF in Two Months for Global Classified Site

cybersecurity

online services

Customer

ranked among the Top 10 global internet services for posting ads about products, job vacancies, and resumes in the job market, as well as services from individuals and companies. Monthly audience of over 60 million people.

Goals

in one quarter, it was necessary to migrate from a cloud-based SIEM installation to in-house computing resources, ensuring the transfer of existing tailor-made cybersecurity content-pack and data-sources pipelines.

Tasks

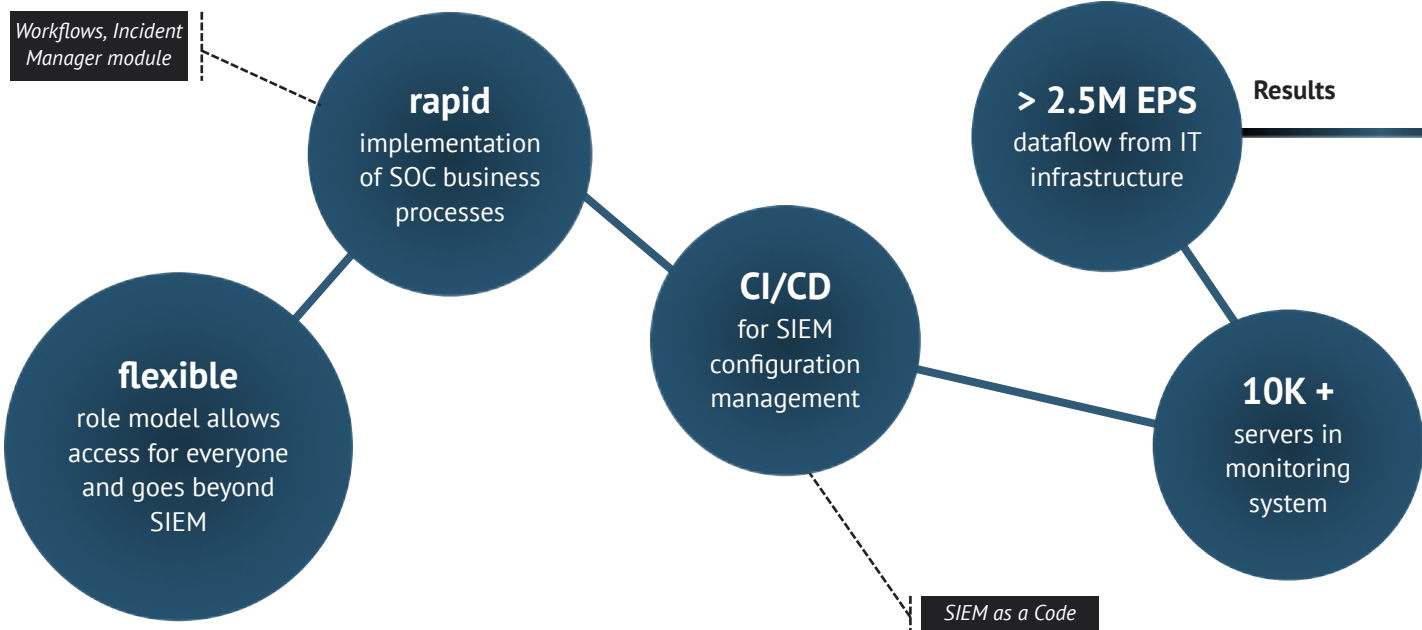

migration from Cloud-native SIEM Solution Microsoft Sentinel

shift SIEM to on-premises infrastructure

create new tailor-made correlation rules by customer tech staff

shift SOC business process to Search Anywhere Framework

Workflows, Incident Manager module
